Pourbaix diagrams (-0.8V < Eh < 1.2V, 0 < pH < 14) for all elements configured in a periodic table based on the original table by Mendeleev as still used at JINR ([http://flerovlab.jinr.ru/flnr/dimg/Periodic\\_Table.jpg](http://flerovlab.jinr.ru/flnr/dimg/Periodic_Table.jpg)) with placement of the lanthanides and actinides according to Laing (2005) Found Chem 7:203-233. It appears similar to the "Leningrad Monument To The Periodic Table" (see also Laing, 2005).
